

WAVE

WAVE FLOOR GUIDED

Continuously hinged wall with its weight supported on the floor.

TECHNICAL DETAILS

Wave Door

WAVE can include a single/double door or, ultimately, a full height pass door. Single doors are the closure of a continuous system and can be double if two walls join in the middle, adding the possibility of having a fixed door on the opposite side of the wall jamb.

Floor Track

The floor track allows the weight of the structure to rest on it, as well as the closing mechanism. It is a discreet piece and prepared to be adapted to the floor with or without finishing.

WAVE TOP HUNG

Suspended continuously hinged wall with no floor track.

Enclosed Hinges

WAVE hinges are hidden. Thus, when the wall is closed, there is no element to counter the continuity of the wall. It is one of the outstanding aesthetic points in the development of the wall and is highly sought after by architects and designers.

Suspended without track

WAVE can work suspended on a rail fixed to the slab, running free underneath with no need for any inferior guidance. Alternately, the panels are equipped with a mechanism that ensures the fixation and positioning of the system.

WAVE OPERABLE WALL

Suspended independent element wall with no floor track.

FINISHES

Unicolor MFC

WHITE
- B3822

LIGHT GREY
- L166

Wood MFC

NATURAL NEBRASKA OAK
- H3331 ST10

NATURAL DIJON WALNUT
- H3734 ST9

HPL

WRITABLE WHITE BRIGHT

Glass

JET BLACK - RAL 9005 (standard)
PURE WHITE - RAL 9010

Note: Other panel finishes and, profiles and glass painting under demand.

WAVE FLOOR GUIDE

WAVE was developed in response to market needs to segment spaces, taking into consideration a high aesthetic sense. Innovative and minimalist, WAVE is a wall with enclosed hinges, which is simple to install, ensuring space isolation and fast parking. WAVE FLOOR GUIDED was designed with a floor track, having the wall weight totally supported by it.

TECHNICAL DATA

Dimensions

Thickness in mm – 71mm

Construction

Finishes – MFC | HPL | MDF | GLAZED

Element connections – aluminium profiles

Operation

Manual

Acoustic Rating dB (RW) 42 - 43

Thickness (mm) 71

Weight kg / m² 31(G) - 28(S)

Max Panel Height (mm) 4000

Max Panel Width (mm) 500 - 1200

Panel Construction / Frame Aluminium

Max Opening Width (mm) Adjustable

Key-Points

Ceiling telescopic track, adaptable to different spaces

Available in a wide range of surface finish options

Floor supporting system

Panel closing system

Including pass door panels and glazing

High aesthetic wall

Hidden hinges

WAVE^{TOP} HUNG

After WAVE FLOOR GUIDED success, WAVE TOP HUNG was created for customers looking for an alternative without floor track. The weight is now supported by the upper rail, reinforcing its innovative side and without ever losing its minimalist side.

TECHNICAL DATA
